What Happens to Your Car

Our certified technician applies Koch-Chemie nano-ceramic to your car's paint. Nano-particles fill every microscopic pore and bond permanently. Your car is transformed.

01

Paint Correction First

Every swirl, scratch and imperfection removed before coating.
Your paint is flawless before we begin.

02

Nano-Ceramic Application

Koch-Chemie applied by hand in our dust-free studio.
Each panel receives a precise, even coat.

03

Curing & Final Inspect

Coating cures under controlled temperature.
Every surface inspected under studio lighting.

Why Your Car Shines Like Never Before

- ✓ Dirt & water slide off — fewer washes
- ✓ UV rays can't fade your paint
- ✓ Bird acid & rain can't etch the surface
- ✓ Deep mirror gloss that lasts 3–5 years
- ✓ Micro-scratch hard surface layer
- ✓ No waxing or polishing ever again
- ✓ Protects & lifts resale value
- ✓ Safe on all paint colours & EVs

What Koch-Chemie Ceramic Coating?
