How We Care for Your Car

We heat purified water to 150°C. No detergents. No abrasives. Pure dry steam lifts

every contaminant from every surface — inside, outside, engine bay. Spotless.

01

Pre-Inspect

Paint, coating type checked.
Special areas noted before start.

02

Exterior Steam

Panel-by-panel steam dissolves
grime without touching paint.

03

Interior Steam

Dashboard, seats, vents, carpets
— all sanitised. 99.9% bacteria g

04

Polish & Hand

Microfibre buff. Every surface
checked before handover.

Why Your Car Feels Different After Steam

- ✓ No brushes = zero swirl marks on paint
- ✓ Extends the life of PPF & ceramic coating
- ✓ Eliminates allergens — safer for families
- ✓ Penetrates every gap chemicals can't reach
- ✓ 95% less water — eco-responsible wash
- ✓ Zero chemical runoff into drains
- ✓ Safer for EV battery & charging systems
- ✓ Leaves paint drier, no water spots

Steam vs Traditional Wash — Real Numbers

Water Used:	150–200 Litres	→ 5–8 Litres
Chemicals:	Detergents + Acids	→ Zero — Pure Steam
Paint Contact:	Brushes & Sponges	→ Contactless

"Clean without contact. Sanitised without chemicals. Spotless, every time."
